Vembu Cloud BDR Suite

Vembu Cloud BDR Suite is a comprehensive and cost-effective cloud backup solution for SMBs and is highly secure and scalable. You can backup your data from File Servers, Application Servers, Endpoints, and Microsoft 365 directly to Vembu Cloud. You will have the flexibility to recover your backup data anywhere at any time from the Vembu Cloud. Vembu holds its cloud servers in Amazon Web Services (AWS) and helps to comply with all the major regulations globally as ensured by AWS

Customer Quotes

"We have used Vembu product for years, starting with its hybrid-cloud backup solutions and like it for its ease to deploy, ease to manage, ease to invoicing, and broad set of scalable offerings from simple file backup up to BCP product lines."

-Lee Wong, Manager of Information Technology at The Mackie Group

---

"Vembu have been a valued partner since starting to use the product around 5 years ago. We've consistently seen improvements and upgrades as needed. When we've had problems they've been there to help, no hard sales and no fuss."

-Alan Morris, Head of Technical Services, Cyngor Sir CEREDIGION County Council

---

Our biggest challenge was to find a vendor that would allow us to host our own backups (both for our own infrastructure but also to sell as a service to our clients). Vembu ticked the boxes well for a low cost of entry and license fee structure and gives you the ability to host your own backup data or if you want to use their cloud storage.

– John H, President, Small-business
